

A NEW WAY TO CLOSE THE CYBERSECURITY SKILLS GAP

Avoid the scramble for scarce knowledge and find
the support you need to protect your business

HERE'S AN INCONVENIENT TRUTH...

Every financial services business is a target for hackers. Even modest wealth management teams hold vast amounts of valuable and sensitive data that can be sold on the dark web or held ransom by bad actors.

But not every business has the resources to establish an enterprise-grade security posture. Finding the right technology is only one piece of the puzzle. Sourcing, retaining, and making the best use of cybersecurity expertise is the real challenge. And it's getting more difficult and more expensive every day.

WHY THE SKILLS GAP IS GROWING

The skills gap is growing for one simple reason – demand is outstripping supply.

The shift to remote working has extended every businesses security perimeter and created new vulnerabilities. It's also led to a reliance on cloud applications, which call for specialized cybersecurity skills.

The sheer volume of attacks is also on the rise. Ransomware and malware are particularly prevalent threats – according to a recent Osterman Research report, only half of organizations are equipped to protect against these attacks.

WE'RE HERE TO SOLVE THIS PROBLEM

There's no silver bullet for bridging the cybersecurity skills gap. You may not have the capacity for in-house cybersecurity management to begin with. And this is where we come in.

We can provide you with the knowledge and support you need to protect your operations and safeguard sensitive data, liberating you from the responsibilities of having to monitor, respond and remediate threats.

Our enterprise-level security services and consultants provide end-to-end, always-on security coverage. Whether you need governed compliance, assured migration, or cloud security, we can help.

WE CAN HELP YOU:

Set and manage policies.

Gain visibility across assets.

Correct compromises and human error.

Generate threat intelligence on a continuous basis.

Conduct around-the-clock, 365 monitoring and incident response.

THE MATHEMATICS OF MANAGED CYBERSECURITY

Save 20-40% on cybersecurity management costs.

Reduce critical vulnerabilities by 90%.

Improve your security profile 3X faster.

Visit our cybersecurity hub to learn more.
